dazzle.

# IT WAS IN THE MID-FORTIES THAT THE THREE GASSER BROTHERS, LOUIS, ROGER AND GEORGE, DECIDED TO COMBINE THEIR TALENTS AND SET OUT ON THE NEXT PHASE OF THEIR LIVES.

---

With a few ideas and strong work ethic, they set up shop to work with a relatively new material at the time, aluminum. Tapping into some of the local expertise available in their industrial

Photo: (From left to right) Louis Gasser, Roger Gasser and George Gasser

hometown area of Youngstown, Ohio, they began providing services to local companies, such as assembling aluminum storm windows and screens, welding aluminum beer kegs, and even fabricating custom parts for a prototype helicopter.

Driven to develop their own product line, they began designing and manufacturing aluminum-frame dinette sets. With minor success selling these chairs and tables close to home, a young George Gasser loaded a few chairs into the

back of his car and headed to Chicago to exhibit at the National Restaurant Show. Attendees were intrigued by Gasser's highly durable, lightweight chairs and, at the close of

the show, George left Chicago with a nice order, several good leads and a whole new market to develop.

The brothers realized that if their young company was going to succeed, however, innovative design alone was not going to be enough. It was during this period in the company's history that the key components of their business – enduring work ethics, sound engineering principles and meticulous attention to detail – were established.

### **A million ways to dazzle.**

Most chairs are designed to fill a space. Gasser chairs are designed to elevate it. For over 65 years we've been designing, building and perfecting the art of commercial seating, using only the highest quality materials. When you buy a Gasser chair, you're making an investment in style, innovation and durability that will be a better value over the long run. Artfully designed, beautifully executed and built to endure, Gasser chairs don't merely perform, they **dazzle**.

TRUE PERFORMERS

Many things have changed in the casino industry since the early days, not the least of which is that slot machines, affectionately referred to as one-arm bandits, were originally designed to play while standing up.

It was in the 1950's that a young entrepreneur, George Gasser, while making a sales call at Harvey's casino in Lake Tahoe, noticed that several gamblers were taking stools from the bar over to the slot area in order to sit while playing the machines. He quickly realized that players who had seats would generally play the machines longer and, armed with that new-found knowledge, returned home to Youngstown, Ohio to build one of the casino industry's first slot stools – a simple round seat and basic 4-leg frame with a footrest, the Gasser model #218.

It didn't take long for operators to see that providing seats to slot players generally resulted in increased playing time at the machines and, therefore, more revenue for the casino.

Gasser has been an innovator since its earliest days in business... creating new styles, improving functionality and humanizing comfort... always to solve a seating problem, enhance an operation or simply make life easier.

Gasser chairs don't merely perform... they **dazzle!**

It's a good bet that anyone who has played at a table game in a Las Vegas casino has sat on a Gasser stool, and odds are good they were comfortable.

Gasser's extremely durable and exceptionally comfortable seating can't help but improve the odds that your table game players will play longer, return to play again and again, and recommend your place to their friends!

Gasser chairs don't merely perform... they **dazzle!**

## ACCESSORIES, FINISHES & OPTIONS

---

### Protective Edge Colors

The Gasser Protective Edge is available in a selection of eleven (11) standard colors and four (4) insert options. Custom or special order colors may be available on request for an additional cost.

### Protective Edge Style Options

The Gasser Protective Edge is available in a selection of eight (8) different profile styles.

### Wood Stain Colors

Various Gasser wood frame chairs & stools are made of either Ash or Maple and offered in a choice of ten (10) standard stain colors. Custom stain colors are available for extra charge.

*Note: Most stain colors adapt differently to the grain pattern and general characteristics of each wood species as well as will exhibiting variations in color intensity from product to product. This is a natural occurrence and should not be considered as a defect or flaw.*

### Metal Finish Colors

Gasser's powder coating finish is a process where metal components have a special paint applied as a powder, then baked and cured to create a highly durable finish. Powder Coating is available in eleven (11) standard colors and three (3) textured colors. Custom colors are available for extra charge.

### Base Styles

Shown are eighteen (18) of the most popular base styles for various gaming stools with typical 21" to 27" seat heights.

### Mobility and Comfort Options

These mobility and comfort options are available on most models: Casters (chairs only), Mega-Glides, Self-Return Swivels, Tilt-Swivels, 360° Swivels and Player Adjustable Seat Height controls.

### Accessories

Gasser offers a few special purpose items designed to improve efficiency, enhance comfort or simply make life easier.

### ADA Seating

To meet ADA requirements, Gasser can adapt or create variations of most models for any game. Drawings/renderings can be prepared for evaluation when needed.

*All color samples shown throughout this catalog are made by the lithographic process. They are intended only for use as a guide, not as a true color representation, and will vary from actual colors. Please contact an authorized Gasser Customer Service Agent to request actual samples.*

Gasser chairs don't merely perform... they **dazzle!**
