# Kettal Projects

Hotels, Resorts, Restaurants,  
Cruise ships, Offices...

Kettal is preferred supplier of the best  
high-end hotel chains such as  
Four Seasons, Accor/Fairmont, Melia,  
Shangri-La, Marriott/Starwood, etc.

# Architecture

Bringing order, form and structure.

Kettal pavilions seek to bring order, form and structure to outdoor areas. Functionally, they are designed to provide shelter: to shade and cool or protect from the wind and rain.

Ecological  
awareness

Choosing materials  
—being a large business comes with  
large responsibilities

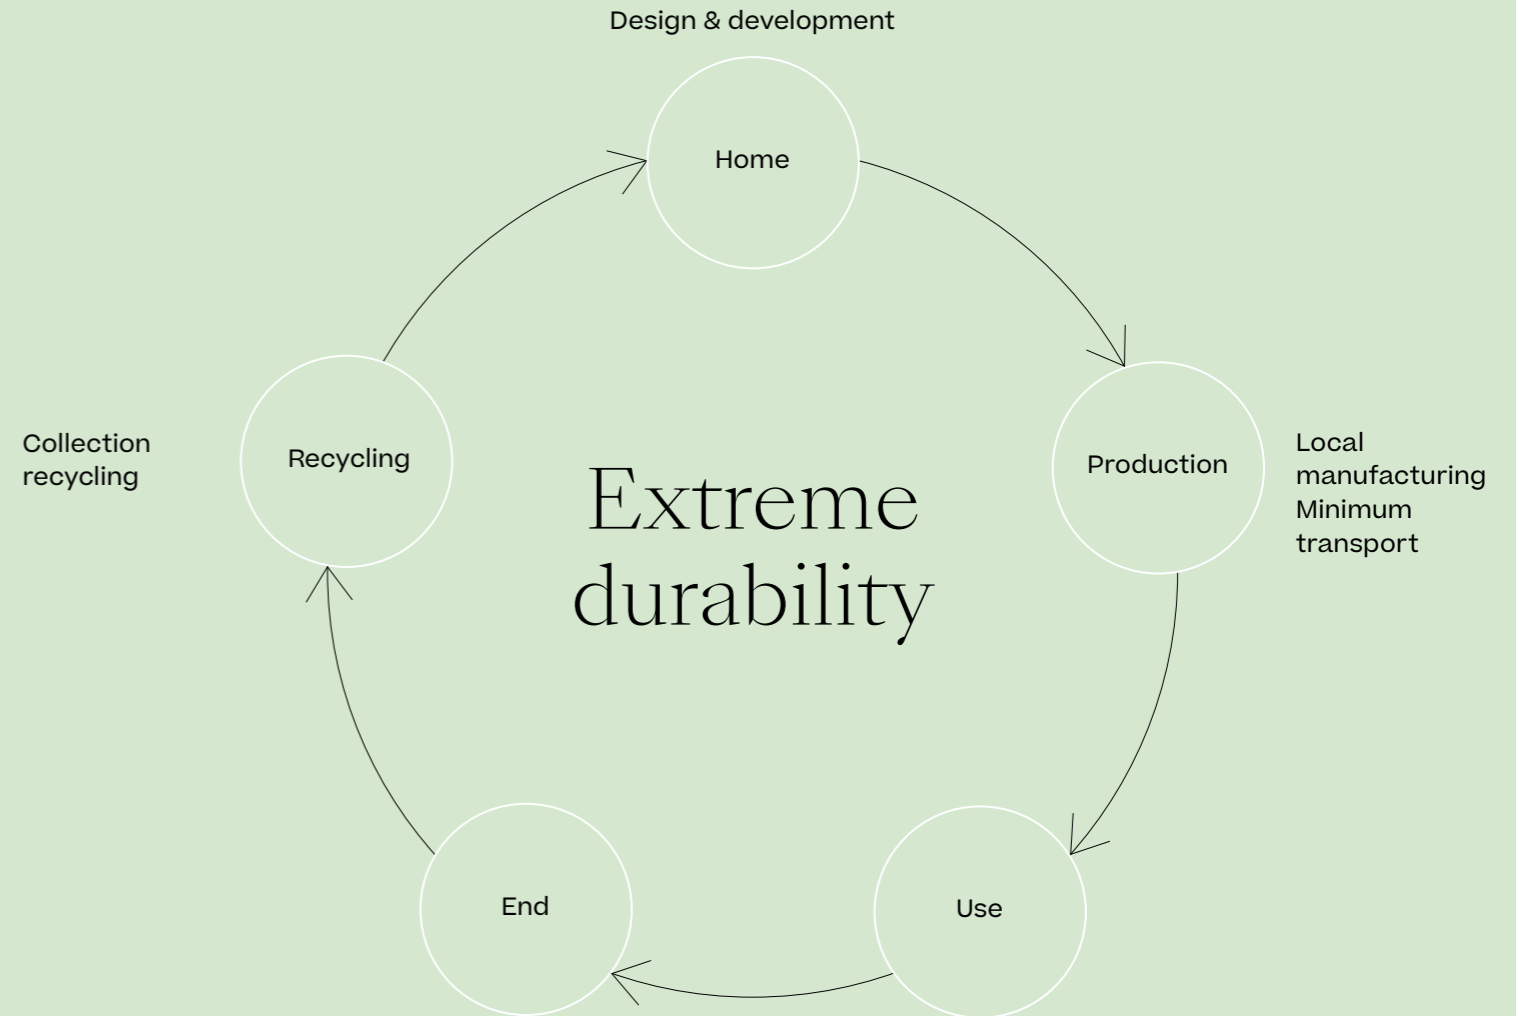

Choosing materials for us is about making responsible decisions. When we're not able to use renewable resources, we aim for recycled or recyclable ones.

# Recycled & Recyclable

(recommended materials)

# Life cycle analysis

# Ecological awareness. To buy responsibly means to keep for a longer time.

For us at Kettal, ecology is not marketing. It's a very serious matter. We have analyzed the variants of product life cycle to minimize environmental impact as far as possible. Not only in our raw material usage, but also other variables such as CO2 emissions from transport or use and durability.

Raw materials: Not only are they recyclable but also recycled. We study the impact of the material over time. There is no point using a very ecological material if, due to its construction, it needs to be replaced many times during the product's life cycle, thus multiplying the pollution caused by its production process.

Okm production: Trying to produce all components close to our Kettal production center in Barcelona is one of the brand's objectives to reduce CO2. The essential raw materials used at Kettal, such as fabric, rope and aluminum, are produced within a radius of 100km.

Use and durability: We do not build in obsolescence. Each design is aesthetically designed and technically developed to last as long as possible. The longer a product lasts, the less often it has to be replaced and therefore the fewer production processes that have to be carried out.

Accordingly, we at Kettal keep technical drawings and product patterns that are 30 years old in order to be able to replace components and extend the life of the product.

Kettal is developing and manufacturing in Europe with a straight focus on the LEED standard requirements. Kettal Quality & Certification management team is

coordinating the LEED Certification process with an external LEED specialist consultant.

Selection of local partners and suppliers (Short Distance Supply Chain).

Selection of long life cycle manufacturing components and techniques (Aluminum, coating, fabrics, foams, secured glass).

Selection of environmental certified materials (OekoTEX, EPD, FSC).

Selection of recycled and/or recycled materials (Recycled aluminum, recycled foam, recycled fabric).

### Warranty terms

For domestic use, all products, except for cushions, covers and fabrics (including textiles), are guaranteed for a period of five years against any manufacturing defect that affects their suitability for use. This applies to normal conditions of use and maintenance. This guarantee does not apply to faults or imperfections resulting from the passage of time or normal wear and tear. Circumstances not covered by this guarantee include, but are not limited to, the fading or change in shade of colours, changes in wood texture, scratches resulting from use, etc. For non-domestic use, by the hotel and catering industry and collectives for example, all products, except cushions, covers and fabrics, are guaranteed for a period of two years. This guarantee is subject to the same conditions as outlined above.

### Technical specifications

Committed to innovation and quality, Kettal's collections are manufactured to the strictest quality standards, from the selection of the materials, to the quality and safety testing of the furniture.

### IMO Certification

Upon request, we can certify our products under the IMO standards.

We would love  
to hear from you.
